OUR EXPERIENCED TEAM WILL CRAFT AND IMPLEMENT YOUR COMPLETE TURNKEY ORACLE MSCA SOLUTION IN 30 DAYS

Gaea is the leading Oracle MSCA implementation partner

We'll design and deploy a solution so that you can effortlessly manage your entire business from anywhere. Mobilize your manufacturing, quality, receiving, inventory, and shipping today with Oracle Mobile Supply Chain Applications (MSCA).

Why Oracle MSCA?

Oracle MSCA, part of the Oracle EBS Supply Chain suite, will improve your data accuracy, increase speed and convenience, and deliver streamlined business processes and improved efficiency. It supports smartphones, tablets, and rugged handheld and vehicle-mounted radio frequency (RF) devices. Oracle MSCA offers a device-independent platform that supports all standard barcode encoding formats including 2D and embedded data-field identifiers.

Oracle MSCA leverages your established business processes in Oracle Receiving, Inventory Management, Shipping Execution, Discrete Manufacturing and Quality, Process Manufacturing, and Enterprise Asset Management, and provides an alternate, execution-based user interface that doesn't add complexity or overhead to those processes. After Gaea implements your mobile hardware and labeling, users can choose how to perform their transactions. Oracle MSCA provides a simple mobile user interface for all core supply chain execution functions.

Our experts quickly deliver powerful, elegant solutions

Our decades of experience with Oracle Supply Chain Management empower us to help your organization hit the ground running quickly and with total accuracy. We analyze your processes and implement the features that will provide unprecedented flexibility in the ways that you purchase, design, implement, and manage your supply chain business.

FAST, EASY DEPLOYMENT WITH RAPID ROI

Oracle MSCA users experience a tremendous increase in accuracy, efficiency, and mobility, and a decrease in errors caused by manual data entry.

MOBILITY
Leverage mobility for distribution, manufacturing facility efficiency.

ACCURACY
Drive inventory and transaction accuracy with real-time validation.

PRODUCTIVITY
Improve team productivity with streamlined user experiences.

VISIBILITY
Increase material handling visibility by transaction.

Rapid ROI

Gaea will have you up and running in a month with:
- Real-time, RF-based, device-agnostic mobile transaction user interfaces
- Use of Android, iOS, or other devices
- Label printing and barcode scanning
- Support for transactions and inquiries in receiving, inventory, shipping, discrete manufacturing and quality, process manufacturing, and maintenance
- Character and graphic mobile user interface
- Mobile personalization to change field labels, action labels, hide fields, make fields required, etc.
- Robust supported barcode formats including 2D, concatenated barcodes, and out-of-order scanning
- Print and scan industry standard product barcodes EAN-8, EAN-13, UPC, EAN/UCC-14

MSCA transactions

- Receipts
- Inspection
- Picking
- Shipping
- Counting
- Move orders

- WIP moves and completions
- WIP issues and returns
- Real-time inquiries
- Labeling
- Warehouse moves

Low Risk

Gaea will help you implement a real-time, barcode-enabled mobile supply chain solution with minimal disruption to your business.

High Reward (Industry Averages)

- Improve inventory accuracy > 99%
- Improve employee productivity 10-30%
- Lower labor and inventory costs 10-20%
- Rapidly adapt to changes
- Improve customer service
- Enhance overall efficiency
- Increase trade velocity
- Reduce transportation costs
