

Gaea

At Gaea, we want to build and implement the best enterprise software solutions.

Gaea is an inter-disciplinary, cross-functional team focused on solving specific challenges in the construction, complex engineering, and supply-chain industries. We provide domain-centric business intelligence and analytics services, and strive to create the best EPPM, supply chain, cost controls, and scheduling solutions for our clients.

Gaea was founded in 2007 by experts from Oracle's Value Chain and Primavera product development organizations. We leverage our global reach, lower cost base, and 24/7 service to deliver fundamentally superior ROI.

Our headquarters are in Santa Clara, CA, and we have a local presence in Great Britain, India, Malaysia, and the Middle East. We are an Oracle Platinum Partner with an established track record of delivering unparalleled value and customer satisfaction to our clients around the world.

Our Focus Areas

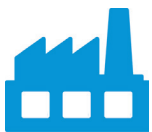

Enterprise Project and Portfolio Management

Manage your organization's entire portfolio lifecycle with best-in-class enterprise project and portfolio management (EPPM) services. Our global delivery team has implemented Oracle Primavera EPPM in a wide variety of industries. Using best practices gained from these implementations, we design solutions to maximize ROI in new Primavera implementations and upgrades of previous versions. And, our team is led by the original architect of Primavera.

Cost Controls and Capital Planning

Gaea is the leading Oracle implementation partner for Primavera Unifier, the leading project lifecycle management solution for capital planning, project delivery, cost control, and facilities management and real estate (FMRE). By using Agile and Scrum methodologies in our implementation process, we are able to deliver multiple modules with short iteration times.

Supply Chain Execution

We provide a full suite of services for implementing and optimizing Oracle's Value Chain Execution solutions including Warehouse Management Systems (WMS), Mobile Supply Chain Applications (MCSA), Oracle Transportation Management (OTM), and Manufacturing and Shipping Execution (MSE). Our team is led by the original architects of WMS and MSCA. Their combination of in-depth knowledge of Oracle's products with an appreciation of real-world challenges and opportunities garnered through decades of consulting experience creates an unstoppable force.

Gaea offers a comprehensive suite of value chain planning services to enable best-in-class supply and demand planning business processes, using Oracle's Advanced Planning and Demantra Demand Management solutions. Our suite of tools includes demand planning to sales and operations planning, supply planning and scheduling, and designing of resilient supply chain networks.

Business Intelligence and Analytics

Power innovation and gain an edge on the competition with Oracle Business Intelligence (BI). Gaea offers a complete and integrated range of enterprise-class BI solutions to help organizations gain insight and drive the best possible outcomes across departments.

Our Clients

Gaea has more than 100 clients, manages more than \$50 billion in projects, and manages \$1 billion worth of inventory. We have delivered enterprise solutions to clients of all sizes, from Fortune 50 companies to small and mid-sized businesses.

Managed \$5-billion capital spend at the world's largest search engine.

Reduced inventory-carrying costs at the world's largest manufacturer of RFID tags.

Managed capital costs at the world's second-largest airport.

Partial Client List

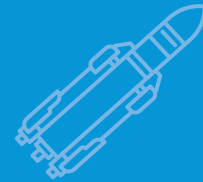

Industries We Serve and Our Services

HIGH TECH
Telecom
Network equipment
Semiconductor

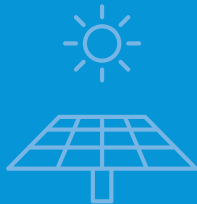

INFRASTRUCTURE
Airports, rail, and road
Transportation and logistics
Communications

PUBLIC SECTOR
Aerospace and defense
Federal and state agencies
Educational institutions

MANUFACTURING
Discrete manufacturing
Process manufacturing
Industrial manufacturing

ENERGY and RESOURCES
Oil and gas
Utilities
Engineering and construction

HEALTHCARE / LIFE SCIENCES
Medical devices
Hospitals
Pharmaceuticals

Project Management

Holistic PPM
Portfolio optimization
PM extensions library

Scheduling Integrations

P6 / Unifier / ERP
P6 / Agile / EBS
P6 / Maximo / JDE

Cost Controls

Capital planning
Analytics

Supply Chain Execution

SC simulation
Real-time analytics
Extensions library

Infrastructure

PBox
24/7 technical support
24/7 functional support
Hosted offerings

Training

PMI certification
Authorized P6
bootcamp provider

BPO

Scheduling / logistics
Onboarding
E&C claims processing
Project analytics
Risk management
