# GAEA DELIVERS SUPPLY CHAIN AND WAREHOUSE OPTIMIZATION

## Gaea has Completed More than 100 Warehouse Implementations Worldwide

Every organization wants a solution that will improve efficiency, reduce errors, and work with existing logistics applications. With more than 100 successful warehouse implementations, Gaea is positioned as the leading Oracle Partner to provide the very best logistics rollouts. We want your organization to have an excellent implementation experience, and to see positive results quickly following your solution go-live date.

## Gaea Implements Adaptive WMS and SCM Solutions for Every Industry

As companies innovate and their business models and customer profiles change, their supply chains needs to adapt. In their previous roles at Oracle, Gaea founders were architects who built Oracle Warehouse Management System (WMS). Our deep product knowledge and years of implementation experience help us consistently deliver compellingly successful solutions for clients of every size and industry around the globe.

## Adapt to Volatility and Innovation

Gaea has helped numerous clients align their warehouse management systems to quickly respond to market opportunities and challenges. With Oracle WMS, we ensure the company can adapt to any innovation or mitigate risk during times of volatility.

## Create Holistic Supply Chains

Warehouse increasingly perform additional functions: assembly, manufacturing, repair. They are part of extended value chain processes including transportation management, procurement, manufacturing, order management, spare parts and repair operations, asset management, and maintenance. We help integrate and optimize Oracle WMS with the processes and applications driving these functions. By building a holistic solution for your organization, you're able to respond rapidly to business changes, and maintain full visibility over every business aspect so that key metrics can always be measured and improved.

## Scale in Complexity

Clients demand the goods they want, when they want them, in perfect condition, and to their unique specifications. Warehouses must handle more items, with greater speed and accuracy, on increasingly complex orders. Gaea offers a broad range of materials management functionality that meet the different needs of our clients for facilities of all sizes.

- Transform logistics into a source of competitive differentiation through increased agility
- Scale operations quickly by deploying decoupled, distributed warehouse management
- Improve warehouse speed, efficiency, and customer service by optimizing core functions
- Increase inventory accuracy and labor productivity
- Reduce costs of handling process exceptions and business changes

## READ WHAT OUR CLIENTS ARE SAYING ABOUT GAEA

**ZEBRA**

" Gaea has been a valuable partner...Benefits we have received through this real-time location solution have been phenomenal."

*Kirk Kroft, Director of IT, Zebra*

**Garden *of* Life**

" Gaea helped Garden of Life open a new warehouse in record time and Synkrato digital labeling was a critical piece of the project, reducing development time and increasing quality and reliability. Partnering with Gaea for all things supply chain has been one of our best decisions ever!"

*Christy Poe, Sr Director IT, Garden of Life*
