# Optimizing Capital Projects Globally

**INEIGHT**

**Innacurate project estimates**
Integrated takeoff, cost and schedule estimating

**Cost overruns in procurement**
Visual procurement to contract management

**DATA INTEGRITY**

**Design quantity growth**
Visual design management

**Field execution overages**
Visual planning to mobile execution

**Innacurate project forecast**
Budget tracking to cost and revenue forecasting

**Missing turnover documentation**
Mobile inspection to visual asset management

## Solving your fundamental challenges

*AM15 Underground, McCook, Illinois*

---

## Outperform Your Peers

With applications trusted for more than 25 years, InEight combines proven software technology with a unified vision to help companies visualize, estimate, manage, control and connect all aspects of capital and maintenance projects. When margins are tight, InEight solutions provide the visibility needed to effectively identify issues, manage risks and guide projects to successful completion.

## One Source of the Truth

InEight connected solutions help companies performing capital asset projects get the visibility and control needed to avoid surprises, increase operational efficiency and improve profitability across the project lifecycle, from the back office to the jobsite. Built on open platforms, InEight solutions can be integrated with other key project-related solutions, such as design, scheduling, document management and ERP systems.

**3x**

REDUCED LABOR OVERRUNS

## In Your Words

"...HD Solutions help Zachry deliver superior value to our customers by enabling us to develop highly sophisticated, integrated and accurate project estimates, plans and schedules."
*Zachry Construction*

"Using HD Solutions' advanced project costing, controls, and reporting resulted in a greater number of new customer wins and a 40% increase in company revenues."
*Aiken Group*

"Tasks that previously took two weeks to convert a project from an estimate into a controls budget have been reduced to one day, a 90% increase in efficiency."
*J.S. Redpath Ltd.*

"One of the biggest benefits of HD Solutions is…it allows us to run 'what if' scenarios across the estimate and schedule for multi-year projects, including the impact of escalation."
*Tetra Tech*

**HD suite | Partner**

# Lifecycle-Oriented Application Suite

**Inspect**
Ensures operational efficiency and compliance by streamlining the field inspection process for equipment, safety, quality and more.

**Design**
Using a model-driven approach, Design gives engineers and designers the tools needed to manage their scopes of work for design-build projects, across all disciplines.

**Progress**
A mobile solution designed to help foremen and superintendents receive (or create) daily work plans, communicate those plans to their crews, and capture results at the end of the shift.

**HD suite**

**Estimate**
Setting the standard for accuracy, performance and multi-user collaboration throughout the estimating process, Estimate includes industry-leading estimating, cost-modeling and benchmarking functionality.

**Plan**
Enabling crystal clear communication of the work to be performed, Plan instills a disciplined and effective approach to work planning.

**Control**
Simplifies the laborious task of managing budget versions by line item, tracking work progress and budget changes, and calculating earned values.

**Contract**
Simplifies the workflow required to create and manage contracts through the duration of the project.

**Cloud Platform**
A modern, standards-based foundation that connects the HD Suite to 3rd-party applications such as design, ERP/accounting, scheduling, and document management.

**InfinyD**
Enables the ability to query across all available project dimensions and visualize the data for processes, including work packaging, quantity trending, procurement, and forecasting.

## InEight Customers:

Serving project-driven companies in the Infrastructure, Building, Mining, Oil & Gas and Utilities industries, InEight now has more than 22,000 active users in more than 500 companies in 33 different countries. Customers range from small subcontractors to some of the world's largest contractors and owners.
